

What Happens After You Test?

As a drinking water laboratory, we provide test results and help you to interpret them. We are not associated with water

treatment companies, nor do we sell water treatment systems, so you never have to

worry about a conflict of interest on our part! After we help you interpret your water quality test results, we'll be happy to refer you to knowledgeable businesses in the Mat-Su Valley, should you need assistance with determining your water treatment needs.

Ensuring that you have safe and palatable drinking water is of paramount importance to your health!

Mat-Su Test Lab provides water quality testing for your peace of mind.

Many of our most commonly requested laboratory tests and their costs are listed inside, but we offer additional testing based on your specific needs. It's our goal to provide you with personalized service and quality results at a price that you can afford!
